

DANCUTTER GRABBER

Dancutter's Grabber

The Dancutter Grabber is a great no-dig tool for removing obstacles stuck inside the pipes - a tree root, beer can, chain knocker or other tools lodged inside a pipe can slow down the work or worst case require digging up the pipe.

The Dancutter Grabber is an add-on to the DC SUPER FLEX and can be opened, closed, and rotated with the grinder switch on the control unit. Powerful gripping teeth on the grabber jaws effectively holds on to the object while you pull it out, and the Grabber moves effortlessly through 45° and 90° bends in 4" - 6" in / 100 - 150 mm or larger pipes.
